## ACADEMIC PROJECTS

- Built a complete Portfolio Manager website with my team of 10 people. We had stocks, liabilities, cryptos and various other components in our website.
- I built a form using HTML, CSS, BOOTSTRAP, NODE.JS, MySQL where the user entered his information and this dynamic data was stored in the MySQL table automatically, and gave each user a unique user id.
- Then I built a profile page using HTML, CSS, BOOTSTRAP, NODE.JS, MySQL where I used the get command to fetch user data from the MySQL table and showed it on my HTML GRID profile page. Individual user could only see their data.
- Currently working on a full stack website with user interface, products and category using HTML, CSS, BOOTSTRAP, NODE.JS, MySQL.
- Built a landing page using Wix for a company named Avaesa which sells products and services for body and soul healing.
- Built a subscriber tracking web application for a youtuber, using MongoDB, Mongoose and MongoDB Atlas.
- Built a landing page for a movie streaming website using React.JS, MongoDB, Express.JS and Node.JS.
- Comfortable with all MERN stacks and libraries.
- Built google forms using REACT.JS and NODE.JS.
